

Message from the School Nurse

As the school nurse for E.G. Hewitt, I would like to welcome you to our school. It is my privilege to have the opportunity to work with the children of the community in which I live. My goal is to enhance the educational process of each student by removing any health barriers to learning. I try to foster an atmosphere of caring and concern for each student so that their emotional needs will also be treated during the course of the school day.

I would like to remind you that we are partners in helping your child learn and grow. A good night's sleep and breakfast every morning will help each child do their best. If a student has a fever, is vomiting or has a persistent cough, please keep the child home to rest and to avoid getting their classmates ill.

Communication is essential in helping us work together. Please notify me of any changes in medication or new physical or emotional conditions that may occur during the year. It is also important to let me know about any new vaccinations that have been given so I can document compliance with state vaccine regulations. By working together, we can create a great school to help your child grow.
